Update Email Address for a Household Admin

Household Admins can manage their profile information, including email address, via TeamNet.

Users can either login directly to TeamNet: teamnet.org

The screenshot displays the TeamNet user interface for Mike Caboteja. The main content area is divided into three sections: Profile Detail, Login & Security, and Teams. The Profile Detail section shows Mike's profile information, including his date of birth (05/01/1999), email address (@demosphere.com), and phone number (+17035552222). A red box highlights the 'Edit' button in the Profile Detail section. A red arrow points from this button to the 'Edit Profile' modal window, which is also highlighted with a red box. The modal window contains the following fields: Universal User ID (685-17522-16), Email (mikecab@demosphere.com), First Name (Mike), Last Name (Caboteja), Birthday (05/01/1999), and Gender (Male). The modal window also has 'Save' and 'Cancel' buttons.

Team Name	Role	Status
Test	Coach	Active
TeamNet Support		Active
TEAM 1 Competitive - 2017-2018	Coach Other	Active

OR

They can click on the Manage Profile button from the My Account Information tab on the RosterPro Dashboard.

The screenshot displays a Salesforce user interface. At the top, there's a header for 'My Account Information' with a 'Begin Public Registration Process' button. Below this, there are tabs for 'MY PROFILE INFORMATION' and 'MY HOUSEHOLD INFORMATION'. The 'My Profile' section shows user details: Name: Mike, Username: mcab, Email: @demosphere.com, and Phone: 7035552222. A 'Manage Profile' button is highlighted with a red arrow. A modal window titled 'Manage My Profile' is open, showing a 'Manage My User Profile via TeamNet™' button, also highlighted with a red arrow. The modal contains text explaining that the user profile is managed via Demosphere TeamNet™.

A RosterPro Site Administrator is able to edit household information for their members by navigating to the RosterPro tab, clicking Household Management and searching for the household in question.

However, if a Household Admin has *verified* their email address and logged into claim their account, a Site Administrator is not able to change the email address or login information for a user.

To confirm if the email address has been verified, click to edit the member of the household and see if the TeamNet login info has a green, "*verified*" next to it. If it does, the Household Admin will need to log back into their account to make any updates to their profile.
